Sir:

Responsive to the Requirement for Election, Applicants hereby elect Group I, Claims 1-9, drawn to a process for removing sulfur from a hydrocarbon, classified in Class 423, Subclass 242.1, but respectfully requests reconsideration of the requirement for restriction for the reasons given below.

Non-elected Group II, Claims 10-11, drawn to a gasoline or diesel fuel, classified in Class 208, Subclass 1+, is retained in this case pending reconsideration of the Requirement for Restriction.

The Requirement for Restriction is respectfully traversed. The Requirement for Restriction is based, at least in part, on grounds that the invention(s), as set forth in the Office Action, are distinct and have acquired a separate status in the art as shown by the cited classifications, and that the fields of search are not the same.

All art classes referred to in the Office Action properly would be searched, even if the Group II claims do not exist. Claims 10-11 claim a product resulting from the process of the Group I claims.

The claims of Group I, drawn to a process, and Group II, drawn to a gasoline or diesel fuel, are sufficiently closely related in this application to be allowable in a single application. All groups of claims clearly relate to the removal of sulfur from a hydrocarbon stream. Furthermore, the Examiner is respectfully requested to examine MPEP 803, second paragraph, which encourages combinations, such as the combination of the Group I and II claims in this application.

The claims are so closely related in substance as to render reasonable the withdrawal of the requirement for restriction.

Respectfully submitted,
